# Palantir Foundry

The Ontology-Powered Operating System for the Modern Enterprise

0:01 / 0:41

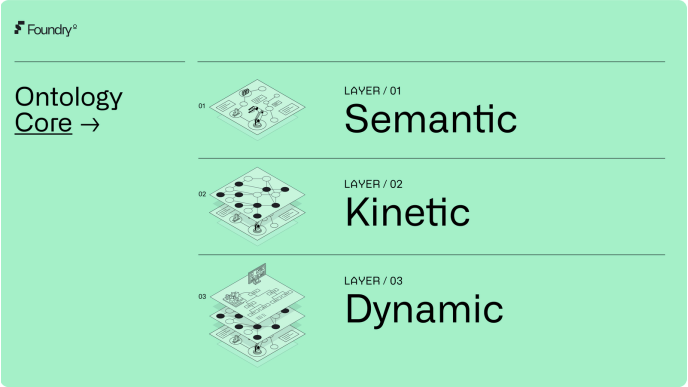
Download Palantir Overview →

# The Foundry Ontology



## Activate your data and analytics in a dynamic system for closed-loop operations.

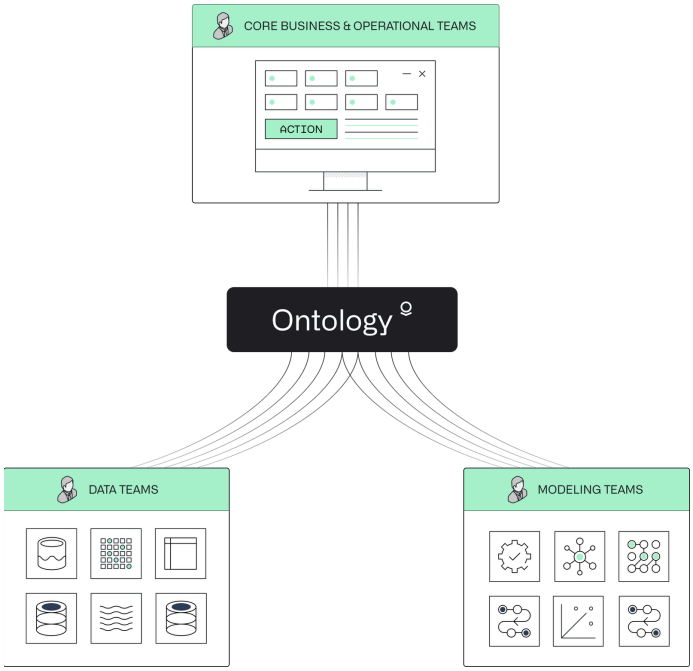
The Foundry Ontology is the heart of Palantir Foundry. It integrates the semantic, kinetic, and dynamic elements of your business — empowering your teams to harmonize and

automate decision-making in complex settings.

Discover the Foundry Ontology →

# Step Into Real-Time Collaboration →

Execute faster with universal logic representing the objects, actions, and processes of your business.



**Activate the Power of Your Data and Analytics.**

Weave your data and analytics directly into the daily decision-making happening across your core business and operational teams. Capture decisions for continuous learning.

---

**Collaboration, Supercharged.**

Achieve real-time collaboration between your data, analytics, and operational teams. Integrate decision-making in a common logic layer, driving meaningful action as conditions evolve.

---

**The Best Way to Build.**

Compose AI-powered workflows on a scalable architecture that re-uses your ontology's multi-modal objects, actions, and processes.

---

**No Duplication.**

Incorporate data and models from your enterprise architecture — without duplicating the underlying assets or fracturing existing sources of truth.

# Ontology-powered Operations Across Industries

For more than a decade, we've embedded alongside our customers to build Foundry backwards, starting from the most critical operational decisions. We've encoded this tradecraft into our product.

Today, some of the world's most important institutions use Foundry to build safer cars, secure global supply chains, accelerate cancer research, and more.

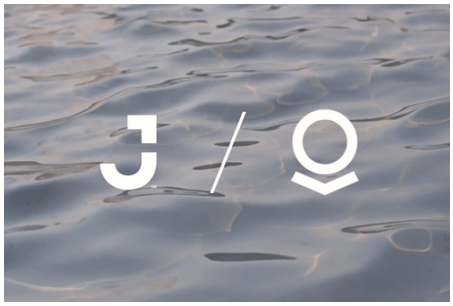
# One Platform. Global Impact.

## Asset Management

JACOBS

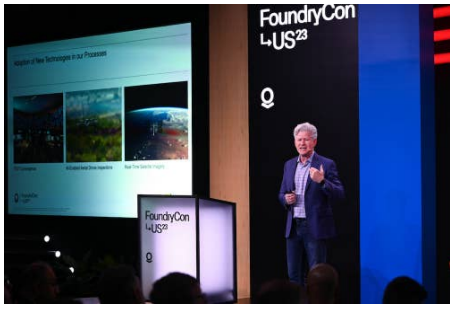


Palantir and Jacobs Smart Algorithms unlocked 20% plant-wide power savings, eliminated operational fines, and reduced greenhouse gas emissions — all at an already-optimized water treatment plant.

SONNEDIX

Sonnedix has deployed Palantir Foundry at their Sonnedix Talayuela solar plant in Spain — and several other solar energy sites — to radically digitize production processes and reduce plant downtime

SOUTHERN CALIFORNIA EDISON (SCE)



The utilities industry has a highly complex IT/OT landscape. In his 2023 FoundryCon keynote, Todd

Inlander, CIO at Southern California Edison (SCE), discussed the value of digital transformation across the industry. At SCE, Palantir Foundry powers workflows that help with wildfire prevention, customer notifications, emergency response, and daily meteorology analysis, leveraging large-scale ML-driven weather forecasting, AI-enabled inspections, and IoT sensors.

## Ecosystems

SKYWISE

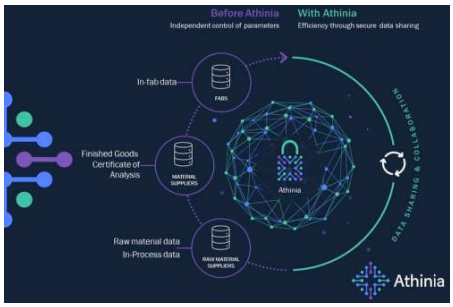
Skywise leverages AI to analyze disparate data sources, offering new insights for the entire aviation industry. With over 25,000 users, Skywise provides airlines with an AI OS to address Aircraft Operations Challenges.

TRAFIGURA

Trafigura leverages Palantir Foundry to power their Supply Chain Carbon Emissions Platform, with a consortium approach that enables participants across global energy & commodities supply chains to model lifecycle carbon intensities and allows industry participants to collaborate for

enhanced visibility and reporting.

ATHINIA™



Athinia™ provides a secure data analytics platform for collaborating on relevant information from participants across the semiconductor industry that can help materials suppliers and device-makers uncover novel insights that improve semiconductor manufacturing by using AI and ML.

NCATS

NCATS securely aggregates and intelligently harmonizes de-identified data from thousands of hospitals and clinics to power advanced research.

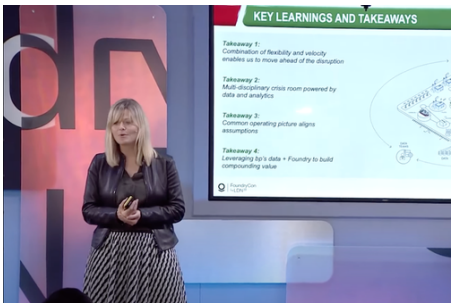
In this paper, machine learning researchers were able to leverage the collective data to effectively identify patients suffering from "Long COVID," despite the absence of accurate diagnosis coding. N3C closely governs data usage and access for this and hundreds of other projects via Purpose-based Access Controls (PBAC).

## Supply Chain

CONCORDANCE

CASTROL

Concordance Healthcare Solutions is using Palantir Foundry to build an ecosystem that can disrupt this fragmented network.



Castrol partners with Palantir to smooth supply chain shocks.

"The combination of flexibility and velocity enables us to move ahead of the disruption and get back from crisis situation into business as usual really quickly, and that's important — especially in difficult times when resources are limited." — Nicola Buck, SVP Marketing at bp and CMO at Castrol

CARDINAL HEALTH

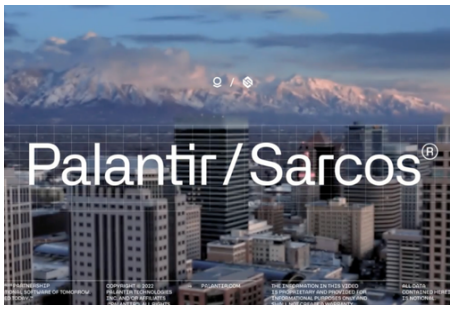
Cardinal Health partners with Palantir to securely integrate clinical data and access dynamic purchase decision insights.

Foundry's AI/ML capabilities empower health care systems by securely integrating and modeling diagnosis, clinical, and purchasing data,

resulting in a clinically-integrated supply chain solution that can respond *to changes* in real time.

## Engineering & Manufacturing

SARCOS



Sarcos is pushing the future of AI and robotics by combining the strength of Sarcos robotic systems with the edge capabilities of Palantir Foundry AI OS.

DOOSAN INFRACORE

Palantir partners with Doosan Infracore to drive the heavy machinery manufacturer's digital transformation and deliver high-quality, market-relevant products to its customers.

## Healthcare Delivery

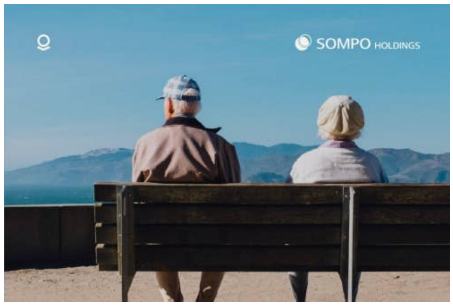
CLEVELAND CLINIC

TAMPA GENERAL HOSPITAL

Cleveland Clinic today leverages Palantir's Virtual Command Center to help improve care delivery across all avenues of operations for the hospital, including streamlining bed assignment and discharge management to reduce wait times and reduce length of stay; optimizing staff allocation to provide more balanced care; and increasing the utilization of critical resources such as operating room block time.

Palantir is enabling Tampa General to take their organization to the leading edge of innovation in healthcare by integrating key data sources and applying advanced analytics in Foundry to deliver insights to caregivers and decision-makers across the health system — from improving operations to enhancing clinical care to accelerating research insight generation.

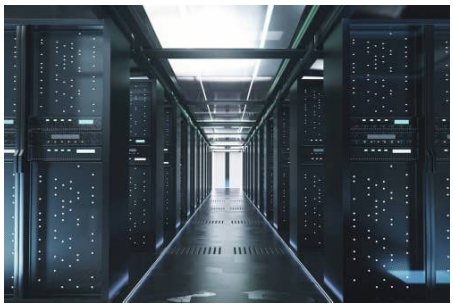
SOMPO



SOMPO's Real Data Platform — powered by Foundry — provides a secure environment for shift workers to view and manage tenant care data, including tailored sensor alerts that measure critical vital signs. Now, data gathering to make care plans that once took 30 minutes can be made at a glance.

## Financial Services & Risk Management

A GLOBAL BANK



Financial organizations use AI to accelerate transaction monitoring and improve risk analysis & compliance.

Transaction monitoring is a critical line of defense against financial crimes & noncompliance. Foundry's AI-powered transaction monitoring has enabled one global bank to resolve alerts 60% faster at 90% lower cost, and to perform multi-jurisdiction client searches 90% faster with increased consistency.

SWISS RE

Swiss Re uses Foundry to connect data repositories into a single analytical data foundation and gain advanced insights into risk while maintaining strong data security & governance. With this visibility and the ability to build sophisticated tools within the platform, Swiss Re is improving the resilience of their clients and society at large.

A MAJOR BANK

A major bank turned to Foundry to power Next Best Offer (NBO) Marketing initiatives, and accelerated the time needed to launch a

campaign from months to a single day.

# Awards ↘

## Palantir Named a Leader in AI/ML Platforms by Independent Research Firm

"Palantir is rooted in building data-driven intelligence applications for complex, high-value government and commercial use cases."

— The Forrester Wave™: AI/ML Platforms, Q3 2022

↳ View the Full Report

## Palantir Ranked No. 1 in Worldwide Artificial Intelligence Software Study in Market Share and Revenue

"Palantir has demonstrated its clear leadership in AI on a global scale from both a market share and revenue perspective...we're excited to see how Palantir continues to separate itself from the competition by solving the toughest business challenges out there with their platforms."

— Ritu Jyoti, IDC's Group VP, AI and Automation

↳ Read the Press Release

## Gartner Names Palantir a Visionary in the Magic Quadrant for Data Integration Tools

— Gartner MQ™, Q3 2022
